HIGH SPEED WORKS

High Speed Traffic Management is a specialist service which often requires the use of Impact Protection Vehicles (IPVs) and their High Speed trained operatives. We can provide a complete and professional end to end service including consultation with clients and Highways Agency. Our dedicated team ensure the meticulous planning is carried through to a seamless project delivery on site.

We specialise in the provision of Temporary Traffic Management in accordance with the nationally recognised Highway Sector Schemes, 12A and 12B.

The services we offer range from High Speed Lane Closures through to IPVs (Impact Protection Vehicles) deployment.

Our services include:

- Road Closures & Diversions
- Contraflow Systems
- Lane Closures
- High Speed Lane Closures
- Impact Protection Vehicles (IPV)
- Variable Message Signs (VMS)
- Advance Warning Signs
- Special Legend Signs made to order
- Bilingual Signage
- Traffic Marshalls
- Site Surveys
- CAD Traffic Management Plans, Scale & Non-Scale
- Call Out Service 24 Hours a Day, 7 Days a Week, 365 Days a Year

STREET WORKS

Our Street Works division deals with Low Speed Traffic Management in and around towns and cities, as well as semi-urban and rural areas. Our Scheme designs can help reduce the impact on the public where site works can be obstructive and inconvenient.

Cobra TM can provide solutions to any Traffic Management requirements addressing each Scheme with the flexibility and resource to service the demands of your works.

Our services include:

- Pedestrian Management
- Road Closures & Diversions
- Priority Systems
- Give & Take Systems
- 2 Way Battery Radio-Lights
- 2,3,& 4 Way Double-headed Lights
- 3 & 4 Way Battery Radio Lights
- 5, 6, 7 & 8 Way Battery Radio Lights (Can be Double-headed)
- Stop & Go Systems
- Contraflow Systems
- Priority Systems
- Give & Take Systems
- Lane Closures
- Letter Drops
- No Parking Cones
- Site Surveys
- CAD Traffic Management Plans, Scale & Non-Scale

PEDESTRIAN CONTROL

Protecting Pedestrians is of paramount importance on every work site we attend and our experienced Scheme designers will always incorporate a demarcated Exclusion Zone preventing the public from entering work areas which may cause them harm.

All our Pedestrian Management schemes can be designed and integrated into more complex Traffic Management Solutions when required or alternatively supplied on a stand-alone basis. This peace of mind allows you to concentrate on your works knowing the public is in safe hands.

Our services include:

- Pedestrian Crossing Systems
- Pedestrian Event Management
- Advance Warning Signs
- Letter Drops
- No Parking Cones
- Bilingual Signage
- Pedestrian Marshalls
- Heras Fencing
- Water Filled Barriers
- Terraplas Walkways
- Site Surveys
- CAD Traffic Management Plans, Scale & Non-Scale
- Call Out Service 24 Hours a Day, 7 Days a Week, 365 Days a Year

EVENT MANAGEMENT

Our aim is to help organisers plan their events by minimising disruption to local traffic and residents whilst maximising pedestrian and crowd safety.

Understanding the expected visitor volume, we will carefully plan all routes in and out of your event. We will then assess any possible visitor impact on the surrounding areas to ensure our Traffic and Pedestrian Management scheme design keeps everyone on the move.

Our services include:

- Pedestrian Control Systems
- Car Parking Marshalls
- Variable Message Signs (VMS)
- Pedestrian Event Management
- Special Legend Signs made to order
- Advance Warning Signs
- Letter Drops
- No Parking Cones
- Bilingual Signage
- Traffic Marshalls
- Heras Fencing
- Water Filled Barriers
- Terraplas Walkways
- Site Surveys
- CAD Traffic/Pedestrian Management
- Plans, Scale & Non-Scale

LOCAL AUTHORITY CONSULTATION

Legal Compliance is fast becoming a complex minefield in Traffic Management and in response Cobra TM has formulated a specific project team to deal with these details in every scheme we undertake.

We can attend site specific meetings with your Local Authority to discuss and gain approval for any proposed Scheme, managing all the details on your behalf. With regular updates via e-mail and phone, you will receive a more personal approach that will allow you to closely monitor the progress of your proposed Scheme application.

Our Consultation Services Include:

- Temporary Traffic Regulation Orders (TTROs)
- EToN/Symology Notices
- National Site Surveys & Site Meeting
- Crane Licences
- Cherry Picker Licences
- Traffic Signal Switch Outs
- Parking Bay Suspensions
- Disabled Bay Suspensions
- Residential Bay Suspensions
- Taxi Rank Suspensions
- Bus Stop Suspensions
- Bus Lane Suspensions
- Advance Warning Signs
- Leaflet Drops
- Site Specific Risk Assessments & Method Statements
- CAD Traffic Management Plans
- Swept Path Analysis Surveys

SURVEYS

Upon receiving your enquiry we will ensure we have a detailed understanding of your proposed works. This is crucial for designing the most appropriate, safe and cost-effective Traffic/Pedestrian Management Schemes. With this information, we will then assign a survey request to one of our highly skilled Surveyors for their assessment. Having the capability to perform physical and/or remote site surveys anywhere in the UK, we will assess your proposed work site in detail to ensure every aspect of safety, compliance and practicality is considered.

We have Surveyors located throughout the UK, all of which are not only trained in every aspect of Traffic Management but they have also gained their experience by actually working on the UK's Roads and Highways. This hands on experience and knowledge truly helps them to appreciate the real life issues which we are faced with on a daily basis. Armed with this hands on experience and knowledge it truly helps our team to consider and then design a Scheme that not only works in practice but also in a live situation.

Our Services Include:

- Full UK site surveys available
- Physical or remote surveys offered
- Hands on experienced team of expert Surveyors
- Safety, compliance and practicality

SYMLOGY ETOn NOTICING

The Street Works Register is fast becoming part of our everyday life and provides comprehensive functionality for both Service Utilities, Highway Authorities and Traffic Managers. Works may be initiated and progressed through a programmed life cycle which accommodates the functions of permission and co-ordination, aimed at minimising traffic disruption. This includes validation to conform to established noticing or permit rules.

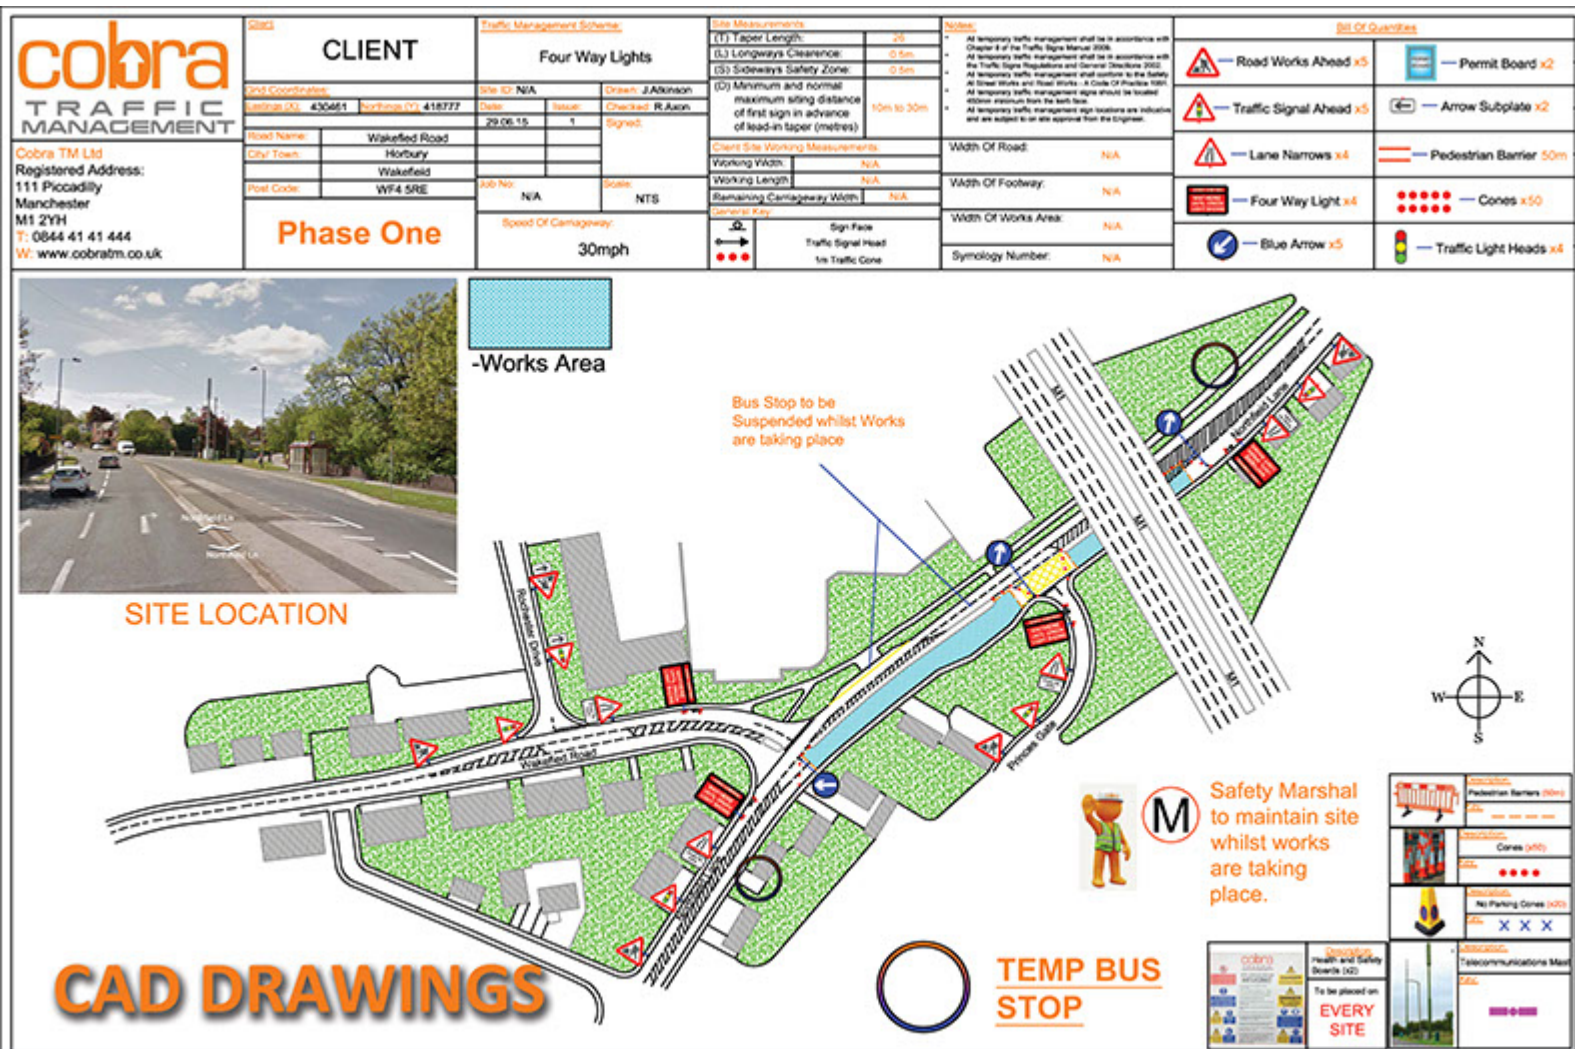

With this in mind, Cobra TM have our very own in-house Symology team for the competent use and management of the Symology system. Trained to the very latest 'ETOn 6' standards, our Symology team will manage your electronic notices from end to end. Providing you with frequent status updates, you will remain completely informed at every stage whilst our team manage the detail on your behalf.

Our Services Include:

- Trained to the latest ETOn 6 standards
- Managed electronic notices on your behalf
- Frequent status updates
- Validating notices or permit rules

TRAFFIC
MANAGEMENT

The need and requirement for accurate, detailed and compliant Traffic Management Plans has increased significantly over recent years and as such Cobra TM have developed a drawings department which is simply unrivalled. Producing CAD drawings of exceptional quality is standard for every Scheme we design. These industry leading TM Plans not only provide a perfect mirror image of how a site is to be deployed but also demonstrate a high level of professionalism when being presented to Local Authority for Scheme approval.

By using our Traffic Management Plans as an effective working document, it significantly reduces the risk of error and miscalculation, thereby increasing cost efficiency and safety on every site we attend. Our continuous investment in the latest Computer-Aided Design Technology ensures our Scheme Design Technicians have the tools to remain one step ahead.

Our Services Include:

- The final CAD drawings are available in all formats for easy viewing
- Send and receive drawings via email in any format
- Where possible within our 24 hour turnaround timeframe
- Stand alone service offered

CLIENT SUPPORT

With our commitment to Excellence as standard at the heart of what we do, Cobra TM firmly believe that our team of experienced Project Co-ordinators and Client Relationship Managers are key to consistently maintaining our strong client relationships. Through direct transparent communication we eliminate all uncertainties ensuring the smooth delivery of every project undertaken.

The implementation of these roles enable Cobra TM to understand your business's needs and requirements on a daily basis and these strong relationships have proven invaluable when facing tight timescales in ever changing environments.

Project Co-ordinators and Client Relationship Managers along with the Out of Hours Support Team are available 24hrs a day to provide support whenever it may be required.

Our Services Include:

- Real time works tracker
- One point of contact for all your enquiries
- Support available 24 Hours a Day, 7 Days a Week, 365 Days a Year

TRAFFIC
MANAGEMENT

Traffic Management can be a hazardous occupation for all involved which is why we at Cobra TM recognise this and promote Health & Safety as our number one priority above all. At the heart of this lies proactive training for all our people, meticulous planning, precise coordinated site deployment and on-going monitoring of all our live sites whilst being underpinned by our Zero Harm target. All our Systems and Processes are regularly reviewed in detail and always adhere to any legislation changes to maintain continued excellence. Site specific Health & Safety work packs are produced which provide clear working methodology and assessment of all potential site risks before any works commence. These safety documents are available upon request and can be submitted with ease for end client approval prior to our site attendance.

Our Services Include:

- Annual assessment for Health & Safety, Environmental & Quality Practices
- Internal Health & Safety resource providing professional advice & support to the team
- Proactive training in any perceived risk areas
- Recognised Manual Handling Training
- Incident analysis identifying root-cause followed by toolbox talks to eradicate potential repeats
- Meeting every 3 months consisting of Safety Representatives from every level within our business
- Site Specific Risk Assessment & Method Statements undertaken for each installation. All TM vehicles hold Health & Safety Gang packs for guidance and reference (including generic TM layouts, chapter 8 signage)
- Management System Safety Audits

ADDITIONAL SERVICES

GROUND PROTECTION

Our composite panels are ideal for temporary roadways, pedestrian walkways and temporary car parks for outdoor events. They will provide ground protection when it is necessary to take vehicles or plant across lawns and parkland, and can be used to protect finished surfaces such as tarmac and block paving from damage on construction sites. They have a non-slip surface to reduce tyre slippage and mud build up.

TEMPORARY ROADWAY

Temporary roadways are the ultimate protection when work areas for heavy plant, machinery and multiple vehicles are required on site. Temporary Roadways are ideal for outdoor events and exhibitions when access is required but with minimal damage to the ground and disruption to visitors allowing ease of traffic flow around a site.

TERRAPLAS

Walkways closures and/or rerouted, Diverting Pedestrians into carriageways not only increases the risk to them, it also increases the risk to road users. Cobra, where possible, always look for alternative solutions. Terraplas is an anti-slip composite covering designed to offer a solution that addresses the dangers of walking on uneven ground whilst protecting the grass beneath. Providing a firm level temporary surface for pedestrians, Terraplas is a recognised and improved pedestrian system which can be built in to any scheme design where necessary.

WATER-FILLED BARRIERS

Water filled barriers are used as an alternative to safety barriers, especially on High Speed Roads or where additional safety is required. This provides protection to both site operatives and pedestrians alike when working or walking around demarcated Work Zones. The water filled barrier hire can be a cheaper alternative to more conventional methods of temporary demarcation.

TEMPORARY FENCING

Keeping an outdoor site safe and secure is a demanding role for temporary fencing. We have a number of different options that can provide the required level of security needed - These range from 2m to 4.12m in height. On the aesthetic side, we can supply fencing to look good in whichever park, green field site or open space they happen to find themselves. Also, the choice of gates for either vehicles or pedestrians is available where necessary.

ACCESS PLATFORMS

Working closely with Powered Access suppliers throughout the country, we can provide any type of Powered Access in any location. Our network of vetted suppliers enable us to incorporate any type of Access Platform in to any traffic or pedestrian management scheme. Call us today and let us take the working at height headache away.
